

Customer value is concentrated—and it is built around a premium wine-and-meat basket

Let's start with the customers who matter most: the top-spend quartile accounts for most historical spend.

2,216 customers

2 years of spend history

6 product categories

3 purchase channels

15.0% latest-campaign response

TOP-SPEND QUARTILE

61.5%

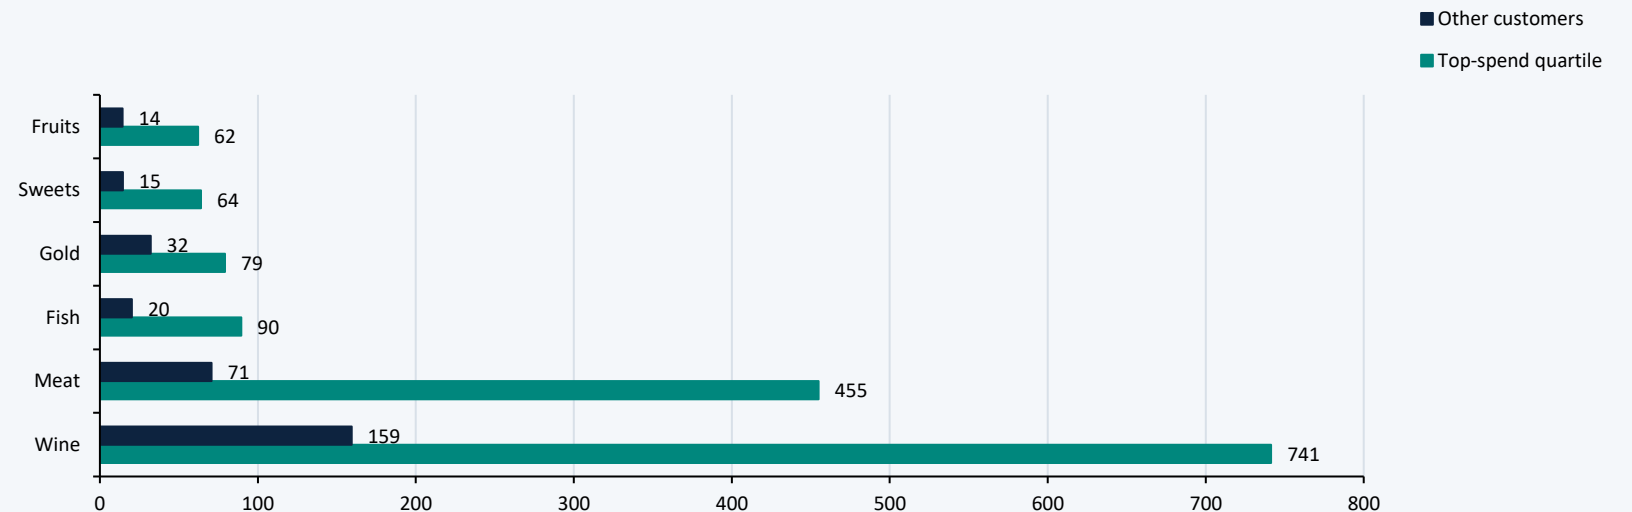

of all historical category spend

555 customers | spend ≥ €1,048

**Average basket: €1,491
vs €312 for all other
customers**

The top quarter generates nearly two-thirds of spend; broad, uniform outreach would dilute investment.

Average product spend per customer (€)

Wine (€741) and meat (€455) make up 80% of the top-spender basket—lead with premium bundles, not gold-product discounts.

A small 11% audience combines high value with demonstrated campaign propensity

Prior campaign acceptance and spend together create a clear first-wave target.

LATEST-CAMPAIGN RESPONSE RATE

Prior campaign acceptance

No prior campaign acceptance

SPEND TIER

Top-spend quartile

249 customers | 11% of base

47.4%

latest response rate within segment

€1,623
avg. spend

306 customers | 14% of base

16.0%

latest response rate within segment

€1,384
avg. spend

Priority: 249 top-spend prior accepters deliver a 47.4% response rate and €1,623 average spend.

Other customers

210 customers | 9% of base

32.9%

latest response rate within segment

€466
avg. spend

1,451 customers | 66% of base

6.7%

latest response rate within segment

€289
avg. spend

PRIORITY
AUDIENCE

11%
of base

47.4%
response

€1.6k
spend

WHO THEY ARE (11% of base)

€75.2k average income | 92.6% have Graduation, Master's or PhD education | 33.3% have children/teens at home

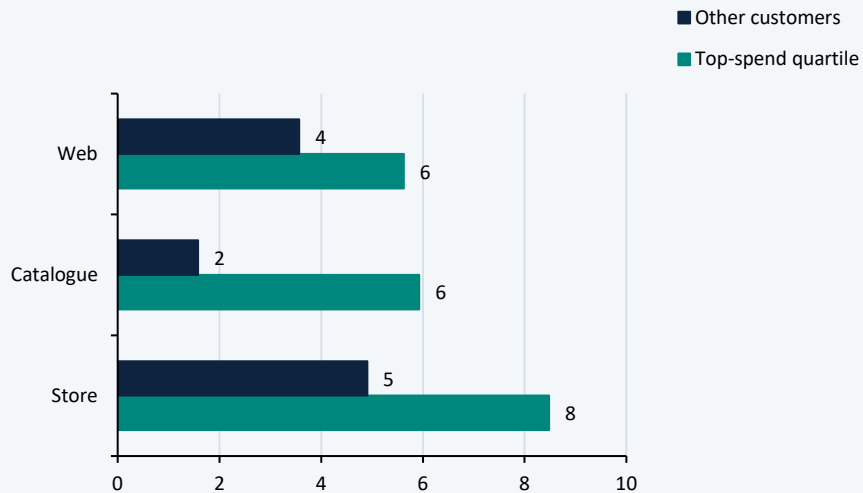

WHAT THEY BUY

Wine + meat = 80% of basket

Use premium offers and the right channel—then prove incremental profit

Three tests turn the observed customer signals into a measurable commercial program.

Average purchases per customer by channel

High-value customers use all channels; catalogue usage is 3.7× higher than the rest of the base (5.9 vs 1.6 purchases).

90-DAY TEST AGENDA

01

Protect the priority 249

Lead with a premium wine-and-meat bundle for top-spend prior accepters.

02

Retain the remaining top spenders

Test a lighter premium offer for the 306 high-spend customers without prior acceptance.

03

Orchestrate channels

Use catalogue-led creative with store follow-up for high-value customers.

Audience evidence

47.4% response rate

Measure: incremental profit vs holdout

16.0% response rate

Measure: incremental response and spend

5.9 catalogue buys

Measure: channel-level profit and repeat purchase

LIMITATIONS & NEXT STEP

The data shows patterns, not causal impact: it lacks offer exposure, campaign cost and product-margin data. Run randomized holdouts, evaluate incremental profit, then build a response/uplift model using spend, recency, channel and campaign-history signals.
